Portfolio

SKILLS

Programming Languages	C/C++, JavaScript
Tools & Platforms	VS Code, Git, GitHub, Vercel, Netlify, Render
Frameworks & Libraries	React.js, Node.js, Express.js, MongoDB, Tailwind CSS

PROJECTS

Study Notion

- **Tech Stack** [React, Redux, Tailwind CSS, Node JS, Express Js, MongoDB]
- Developed a fully functional ed-tech platform enabling users to create, consume, and rate educational content.
- Created a comprehensive Course Catalog for users to view a list of available courses.
- Implemented secure authorization and authentication mechanisms, along with payment integration using Razorpay for course purchases.
- Managed application state using Redux, optimizing website performance for speed and enhanced user experience.
- Utilized cloud-based media management solutions for handling media.
- Integrated APIs and conducted API testing using Postman.

Top Courses

- Developed a comprehensive Course Catalog allowing users to view a list of available courses.
- Implemented features enabling users to like or dislike courses and filter courses based on categories such as Development and Design.
- Utilized HTML, CSS, and React.js for front-end development, ensuring a responsive and intuitive user interface.
- Deployed the application on Vercel, ensuring fast load times and reliable uptime.
- Integrated state management using Redux to ensure efficient data handling and seamless user experience.
- Optimized the application for performance and scalability, enhancing overall user satisfaction

Dev Detective

- Developed a project which fetch the details of GitHub User Using GitHub API and Display it.
- Features like Searching username, Light-Mode and Dark-Mode.
- Utilized **HTML, CSS, JavaScript** for the Front-end Development.
- Deployed the website On Netlify.
